Raiyan Sharif

Senior Mobile Application Developer — iOS, Flutter & React Native
raiyan.sharif.1234@gmail.com — +88 01615575290 — Dhaka, Bangladesh
GitHub — LinkedIn — LeetCode
ITFE Level-2 Certified — Professional Scrum Developer I (PSD I)

Professional Summary

Senior mobile application developer with **7+ years** of hands-on experience designing, building, and shipping production mobile applications across iOS, Flutter, and React Native. Proven track record owning features end-to-end – from RESTful API integration and Firebase-backed data sync through automated testing, release, and post-launch support – for large-scale, mission-critical platforms, including a nationwide government-grade secure communication system. Comfortable working across the full mobile development lifecycle in Agile teams, with strong experience in system integration, secure authentication, offline-first data handling, and cross-functional collaboration with product, QA, design, and backend teams. Experienced in mentoring engineers, leading code reviews, and driving CI/CD automation.

Core Competencies

Mobile Development: Native iOS (Swift, Objective-C, UIKit, SwiftUI), Flutter (Dart), React Native, app lifecycle management, performance optimization, memory & battery efficiency

Integrations & APIs: RESTful APIs, WebSocket, Firebase (Firestore, Auth, Cloud Messaging), JWT authentication, push notifications, third-party SDK integration

Architecture & Design: MVVM-C, MVVM, MVC, Clean Architecture, modular design, reactive programming (Combine)

Data & Security: Core Data, SQLite, Firebase Firestore, Keychain, secure storage, encryption, authentication & authorization

Quality & DevOps: XCTest, XCUI Test, unit/integration/UI automation, Jenkins, Fastlane, GitHub Actions, crash reporting & analytics

Leadership: Team lead, sprint planning, code reviews, mentoring, technical interviews, stakeholder collaboration, release management

Professional Experience

Senior Software Engineer (Mobile Team Lead) Apr 2025 – Present
Synesis IT — Dhaka, Bangladesh

- Lead mobile development for enterprise communication products across **iOS and React Native**, driving architecture, sprint execution, and on-time delivery.
- Own end-to-end delivery for **Convay Chat** and **UCT Chat** – secure messaging, calling, push notifications, and real-time data sync via RESTful APIs and Firebase.
- Led React Native development for the Convay cross-platform client, including architecture, native module bridging, and API integration.
- Delivered a government-grade, nationwide deployment (BCC) requiring strict security, white-label architecture, and JWT-based authentication – directly relevant experience for building large-scale public-sector digital systems.
- Established engineering standards through code reviews, automated testing (XCTest/XCUI), and CI/CD pipelines (Fastlane, GitHub Actions).
- Mentor developers, conduct technical interviews, and collaborate with product, QA, design, and backend teams on scalability, security, and release quality.

Senior iOS Engineer Sep 2021 – Mar 2025
BJIT Limited — Dhaka, Bangladesh

- Developed and maintained large-scale iOS applications for international clients in healthcare, IoT, AI, and communication domains.
- Implemented RESTful API integrations, WebSocket communication, offline-first features, and modular MVVM architecture.
- Delivered production apps including **OMRON Connect** and **Pocketalk** with high reliability and UI polish.
- Contributed to CI/CD automation using Jenkins and Fastlane, improving release velocity and app stability.
- Mentored junior developers and participated in architectural decisions and code reviews.

Mobile Application Developer Mar 2021 – Sep 2021
Relisource Limited — Dhaka, Bangladesh

- Built Flutter and iOS enterprise applications, integrating REST APIs, push notifications, and real-time messaging.
- Developed backend APIs (.NET) for clinical trial and healthcare applications.

Software Engineer Jan 2020 – Apr 2021
Samsung R&D Bangladesh — Dhaka, Bangladesh
- Contributed to **Samsung Health** and **Samsung Gear Manager** – products used by millions of users globally.
- Developed XCUI-based automation testing frameworks to improve regression coverage and release confidence.

Software Engineer Jul 2019 – Dec 2019
Leads Corporation Ltd. — Dhaka, Bangladesh
- Developed mobile banking features: fund transfers, QR payments, bill payments, and account management for **FSIBL Cloud Banking**.
- Ensured security, compliance, and performance requirements with banking stakeholders.

Junior Software Engineer Jan 2019 – Jun 2019
Cimplux Corporation Ltd. — Dhaka, Bangladesh
- Developed e-commerce applications using Django and REST APIs; supported mobile-backend integration.

Selected Projects

UCT Chat *iOS Team Lead*
Swift, SwiftUI, UIKit, WebSocket, Firebase, JWT Auth, MVVM-C
- Government white-label secure communication platform (BCC) with messaging, voice/video calls, and organizational collaboration – a nationwide, security-critical public-sector deployment.
- Led iOS variant architecture: build schemes, branding, universal links, and App Store deployment.

Convay Chat *iOS Team Lead*
Swift, UIKit, WebSocket, Firebase, VoIP
- Enterprise communication platform with end-to-end encrypted messaging, calling, and file sharing.
- Owned push notification handling, authentication, and production release management.

Convay (React Native) *React Native Team Lead*
React Native, TypeScript, REST API, Firebase, WebSocket
- Led cross-platform client development for Android and iOS with shared business logic and native module bridging.
- Drove real-time messaging, API integration, and push notification features.

OMRON Connect *Senior iOS Engineer*
Swift, Bluetooth, Health Monitoring, REST API
- Health monitoring platform integrating OMRON medical devices with secure data sync and offline support.

Pocketalk *Senior iOS Engineer*
Swift, UIKit, AI Translation, AVFoundation
- AI-powered translation application supporting voice, text, and camera-based translation for global users.
- App Store Link

Samsung Health *Software Engineer*
Swift, XCUI Test, HealthKit
- Health tracking platform with large-scale data visualization and fitness monitoring; developed XCUI-based automation testing.
- App Store Link

FSIBL Cloud Banking *Software Engineer*
Swift, REST API
- Mobile banking platform supporting fund transfers, QR payments, bill payments, and account management.
- App Store Link

YRC-BD (Flutter) *Mobile Developer*
Flutter, Firebase
- Flutter-based application for Yamaha Riders Bangladesh to manage rides and events, with real-time updates and push notifications.
- App Store Link

Education

M.Sc. in Information Technology
Institute of Information Technology (IIT), University of Dhaka 2019 – 2021
CGPA: 3.44 / 4.00 (First Class)

B.Sc. in Computer Science and Engineering
American International University-Bangladesh (AIUB) 2015 – 2018
CGPA: 3.72 / 4.00 (First Class) — Thesis: Human Behavior Prediction in Crowded Scene

Higher Secondary Certificate (HSC), Science
Milestone School and College 2014
GPA: 4.90 / 5.00 (First Division)

Secondary School Certificate (SSC), Science
Milestone School and College 2012
GPA: 4.25 / 5.00 (First Division)

Certifications

- ITFE Level-2 Certified
- Professional Scrum Developer I (PSD I)
- B-TopSE Cloud Practitioners (3rd Batch) – JICA-BCC-BASIS TCP, Project for ICT Engineers Development for the Promotion of the ICT Industry and New Innovations; 1EdTech Certified (2026)
